

NewLander's Stage Plot

- For additional information please contact Doug Wilkin at Wilkin Audio Productions at 412.871.5325 or email to; djwaudio@comcast.net
- The monitor mix should have a good balance of each band member and match to the house sound
- A small amount of reverb may be added if the house sound is dry
- Roll off most highs and some mids for fiddle, a low and smooth sound is what we are after
- We may only have one percussionist at some performances
- Please provide bottled water for each performer and CD sales person
- Provide table and chairs for CD sales
- We prefer to conduct the sound check no later than 60 minutes prior to the performance. Expect sound check to take about 30 minutes.
- Stage area needed 20' width by 16' depth preferred, but we are flexible
